APPROVAL OF FINANCIAL STATEMENTS

I am responsible for the preparation of these annual financial statements for the year ended 30 June 2019, which are set out on pages 4 to 75 in terms of Section 126 (1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

The annual financial statements have been prepared in accordance with South African Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

I acknowledge that I am ultimately responsible for the system of internal financial control and that the system of internal control provides assurance that the financial records can be relied on.

I have reviewed the Municipality's cash flow forecast for the year to 30 June 2019 and am satisfied that the Municipality can continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the municipality's audited annual financial statements.

I certify that the remuneration of Councillors and in-kind benefits are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

The annual financial statements were prepared on the going concern basis.

Accounting Officer
Mr. S Jooste

1. BASIS OF PREPARATION

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

The annual financial statements have been prepared in accordance with the Finance Management Act (MFMA) and effective Standards of Generally Recognised Accounting Practice (GRAP), including any interpretations and directives issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

Accounting policies for material transactions, events or conditions not covered by the GRAP reporting framework, have been developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 (Revised – March 2015) and the hierarchy approved in Directive 5 issued by the Accounting Standards Board.

A summary of the significant accounting policies, which have been consistently applied except where an exemption or transitional provision has been granted, are disclosed below.

Assets, liabilities, revenue and expenditure have not been offset except when offsetting is permitted or required by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant notes to the annual financial statements.

In terms of Directive 7: "The Application of Deemed Cost on the Adoption of Standards of GRAP" issued by the Accounting Standards Board, the Municipality applied deemed cost to Property, Plant and Equipment, Investment Property and Intangible Assets where the acquisition cost of an asset could not be determined.

In terms of Directive 11: "Changes in Measurement Bases following the Initial Adoption of Standards of GRAP" issued by the Accounting Standards Board, the Municipality elected to change the measurement bases selected for Property, Plant and Equipment, Investment Property, Intangible Assets and Heritage Assets on the initial adoption of Standards of GRAP.

1.1 Presentation currency

Amounts reflected in the financial statements are in South African Rand and at actual values. Financial values are rounded to the nearest one Rand. No foreign exchange transactions are included in the statements.

1.2 Going concern assumption

These annual financial statements have been prepared on a going concern basis.

1.3 Comparative information

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated, unless a Standard of GRAP does not require the restatement of comparative information. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

The Municipal Regulations on Standard Chart of Accounts (mSCOA) came into effect on 1 July 2017. The municipality has started with a process during the year to align items in the annual financial statements with the Item Segment of mSCOA. The result of this process was a reclassification and naming of items in the annual financial statements. This is set out in note 29 of the annual financial statements.

1.4 Amended Disclosure Policy

Amendments to accounting policies are reported as and when deemed necessary based on the relevance of any such amendment to the format and presentation of the financial statements. The principal amendments to matters disclosed in the current financial statements include prior period error disclosure.

1.5 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decision or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatements judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor. Materiality is determined as 1% of total operating expenditure. This materiality is from management's perspective and does not correlate with the auditor's materiality.

1.6 Presentation of budget information

The presentation of budget information is prepared in accordance with GRAP 24 and guidelines issued by National Treasury. The comparison of budget and actual amounts is disclosed as separate additional financial statements, namely Statements of comparison of budget and actual amounts.

Budget information is presented on the accrual basis and is based on the same period as the actual amounts. The budget information is therefore on a comparable basis to the actual amounts.

The comparable information includes the following:

- the approved and final budget amounts;
- actual amounts and final budget amounts;

Explanations for differences between the approved and final budget are included in the Notes to the annual Financial Statements.

Explanations for material differences between the final budget amounts and actual amounts are included in the notes to the annual financial statements.

The disclosure of comparative information in respect of the previous period is not required in terms of GRAP 24.

1.7 Standards, amendments to standards and interpretations issued but yet effective

GRAP 18 Segment Reporting is effective from 1 April 2015. The implementation of GRAP 18 is delayed, in terms of Directive 5, for municipalities for the 2018/19 financial year and municipalities are not required to apply or early adopt GRAP 18. The implementation date of GRAP 18 is 1 April 2020.

The following GRAP standards and Interpretations of the Standards of GRAP have been issued but are not yet effective and have not been early adopted by the municipality:

ACCOUNTING POLICIES

**1.8 Leases****Municipality as Lessee**

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the Municipality. Property, plant and equipment or intangible assets (excluding licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights) subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the Municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment or intangibles assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest method. Lease finance costs are expensed when incurred. The accounting policies relating to de-recognition of financial instruments are applied to lease payables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined expenses and actual payments made will give rise to a liability. The Municipality recognises the aggregate benefit of incentives as a reduction of rental expense over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern of the lessee's benefit from the use of the leased asset.

Municipality as Lessor

Under a finance lease, the municipality recognises the lease payments to be received in terms of a lease agreement as an asset (receivable). The receivable is calculated as the sum of all the minimum lease payments to be received, plus any unguaranteed residual accruing to the municipality, discounted at the interest rate implicit in the lease. The receivable is reduced by the capital portion of the lease instalments received, with the interest portion being recognised as interest revenue on a time proportionate basis. The accounting policies relating to derecognition and impairment of financial instruments are applied to lease receivables.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised on a straight-line basis over the term of the relevant lease. The difference between the straight-lined revenue and actual payments received will give rise to an asset. The Municipality shall recognise the aggregate cost of incentives as a reduction of rental revenue over the lease term, on a straight-line basis unless another systematic basis is representative of the time pattern over which the benefit of the leased asset is diminished.

1.9 Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets are capitalised to the cost of that asset.

The amount of borrowing costs that the Municipality capitalises during a period shall not exceed the amount of borrowing costs it incurred during that period. The Municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete. Borrowing costs incurred other than on qualifying assets are recognised as an expense in the Statement of Financial Performance when incurred.

1.10 Unspent conditional government grants and receipts

Conditional government grants are subject to specific conditions. If these specific conditions are not met, the monies received are repayable.

Unspent conditional grants are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent government grants, subsidies and contributions from the public.

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent conditional grants are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the Statement of Financial Performance.
- The cash which backs up the creditor is invested until it is utilised.
- Interest earned on the investment is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the liability. If it is the Municipality's interest it is recognised as interest earned in the Statement of Financial Performance.

1.11 Unpaid conditional government grants and receipts

Unpaid conditional grants are assets in terms of the Framework that are separately disclosed in the Statement of Financial Position. The asset is recognised when the Municipality has an enforceable right to receive the grant or if it is virtually certain that it will be received based on grant conditions being met. They represent unpaid government grants, subsidies and contributions from public.

The following provisions are set for the creation and utilisation of grant receivables:

- Unpaid conditional grants are recognised as an asset when the grant is receivable.

1.12 Unspent public contributions

Public contributions are subject to specific conditions. If these specific conditions are not met, the monies received are repayable.

Unspent public contributions are financial liabilities that are separately reflected on the Statement of Financial Position. They represent unspent contributions from the public.

This liability always has to be cash-backed. The following provisions are set for the creation and utilisation of this creditor:

- Unspent public contributions are recognised as a liability when the grant is received.
- When grant conditions are met an amount equal to the conditions met are transferred to revenue in the Statement of Financial Performance.

**1.13 Provisions**

Provisions are recognised when the Municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate of future outflows of resources. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability.

The Municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where an inflow of economic benefits or service potential is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

The amount recognised as a provision shall be the best estimate of the expenditure required to settle the present obligation at the reporting date.

If it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation, the provision is derecognised.

1.14 Employee benefits***Pension and Retirement Fund Obligations***

The Municipality provides retirement benefits for its employees and councillors. Defined contribution plans are post-employment benefit plans under which the Municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

The defined benefit funds, which are administered on a provincial basis, are actuarially valued tri-annually using the projected unit credit method basis. Deficits identified are recovered through lump sum payments or increased future contributions on a proportional basis to all participating municipalities. The contributions and lump sum payments are charged against income in the year they become payable. Sufficient information is not available to use defined benefit accounting for a multi-employer plan. As a result, defined benefit plans have been accounted for as if they were defined contribution plans.

The Municipality operate various pension schemes. The schemes are generally funded through payments to insurance companies or trustee-administered funds, determined by periodic actuarial calculations. The Municipality has both defined benefit and defined contribution plans. A defined contribution plan is a pension plan under which the Municipality pays fixed contributions into a separate entity. The Municipality has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically, defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

**ACCOUNTING POLICIES**

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid and that have terms of maturity approximating to the terms of the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to income.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

For defined contribution plans, the Municipality pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

Post-Retirement Medical Obligations

The Municipality provides post-retirement medical benefits by subsidizing the medical aid contributions of certain retired staff according to the rules of the medical aid funds. Council pays 60% as contribution and the remaining 40% are paid by the members. The entitlement to these benefits is usually conditional on the employee remaining in service up to retirement age and the completion of a minimum service period. The present value of the defined benefit liability is actuarially determined in accordance with GRAP 25 – Employee benefits (using a discount rate applicable to high quality government bonds). The plan is unfunded.

These contributions are charged to the Statement of Financial Performance when employees have rendered the service entitling them to the contribution. The interest cost of the defined benefit obligation is recognised as finance cost in the Statement of Financial Performance, as it meets the definition of Interest Cost in GRAP 25. The liability is calculated by means of the projected unit credit actuarial valuation method. The liability in respect of current pensioners is regarded as fully accrued, and is therefore not split between a past (or accrued) and future in-service element. The liability is recognised at the fair value of the obligation. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as employee benefits upon valuation.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically, unless circumstances change significantly in which case it is done annually, by independent qualified actuaries.

Long Service Awards

Long service awards are provided to employees who achieve certain pre-determined milestones of service within the Municipality. The Municipality's obligation under these plans is valued by independent qualified actuaries periodically and the corresponding liability is raised. Payments are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as finance cost upon valuation, as it meets the definition of Interest Cost in GRAP 25. Defined benefit plans are post-employment plans other than defined contribution plans.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically, unless circumstances change significantly in which case it is done annually, by independent qualified actuaries.

Ex-Gratia Pension Benefits

Ex gratia gratuities are provided to employees that were not previously members of a pension fund. The Municipality's obligation under these plans is valued by independent qualified actuaries and the corresponding liability is raised. Payments made by the Municipality are set-off against the liability, including notional interest, resulting from the valuation by the actuaries and are charged against the Statement of Financial Performance as financial cost upon valuation as it meets the definition of Interest Cost in GRAP 25. Defined benefit plans are post-employment plans other than defined contribution plans.

Actuarial gains and losses arising from the experience adjustments and changes in actuarial assumptions, is charged or credited to the Statement of Financial Performance in the period that it occurs. These obligations are valued periodically, unless circumstances change significantly in which case it is done annually, by independent qualified actuaries.

Staff Leave

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total amount of leave days due to employees at year-end and also on the total remuneration package of the employee.

Accumulated leave is carried forward and can be used in future periods if the current period's entitlement is not used in full. All unused leave will be paid out to the specific employee at the end of that employee's employment term.

Accumulated leave is vesting.

Staff Bonuses

Liabilities for staff bonuses are recognised as they accrue to employees. The liability at year-end is based on the bonus accrued at year end for each employee.

Performance Bonuses

A provision, in respect of the liability relating to the anticipated costs of performance bonuses payable to Section 57 employees, is recognised as it accrues to Section 57 employees. Municipal entities' performance bonus provisions are based on the employment contract stipulations as well as previous performance bonus payment trends.

1.15 Property, Plant and Equipment

Initial Recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the entity, and the cost or fair value of the item can be measured reliably. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

ACCOUNTING POLICIES

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the assets acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

Subsequent Measurement – Cost Model

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the Municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

Depreciation and Impairment

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Depreciation of an asset begins when it is available for use, i.e. when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated useful lives:

Asset Class	Years
Community Assets	
Civic Buildings	100
Other Assets	
General vehicles	11 - 25
Fire Engines	18 - 25
Disaster Management Equipment	10 - 28
Plant and Equipment	9 - 41
Computer Hardware	5 - 25
Furniture and Other Office Equipment	5 - 50
Land and Buildings	
Land	Indefinite
Buildings	100
Finance Lease Assets	
Lease Furniture and Office Equipment	3 - 5

Property, plant and equipment is reviewed at each reporting date for any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated. The impairment charged to the Statement of Financial Performance is the excess of the carrying value over the recoverable amount.

An impairment is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined had no impairment been recognised. A reversal of impairment is recognised in the Statement of Financial Performance.

De-recognition

Items of property, plant and equipment are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Land and Buildings and Other Assets – Application of Deemed Cost (Directive 7)

The Municipality opted to take advantage of the transitional provisions as contained in Directive 7 of the Accounting Standards Board, issued in December 2009. The Municipality applied deemed cost where the acquisition cost of an asset could not be determined. For Land and Buildings the fair value as determined by a valuator was used in order to determine the deemed cost as on 1 July 2007. For Other Assets the depreciation cost method was used to establish the deemed cost as at 1 July 2007.

1.16 Intangible Asset

Initial Recognition

An intangible asset is an identifiable non-monetary asset without physical substance.

An asset meets the identifiability criterion in the definition of an intangible asset when it:

- is separable, i.e. is capable of being separated or divided from the entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, asset or liability; or
- arises from contractual rights (including rights arising from binding agreements) or other legal rights (excluding rights granted by statute), regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

The Municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the Municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale;
- it is technically feasible to complete the intangible asset;
- the municipality has the resources to complete the project;
- it is probable that the municipality will receive future economic benefits or service potential; and
- the Municipality can measure reliably the expenditure attributable to the intangible asset during its development.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Subsequent Measurement – Cost Model

Intangible assets are subsequently carried at cost less accumulated amortisation and accumulated impairment losses. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

Amortisation and Impairment

**ACCOUNTING POLICIES**

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight-line method. Amortisation of an asset begins when it is available for use, i.e. when it is in the condition necessary for it to be capable of operating in the manner intended by management. Components of assets that are significant in relation to the whole asset and that have different useful lives are amortised separately. The estimated useful lives, residual values and amortisation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis. The annual amortisation rates are based on the following estimated useful lives:

<u>Intangible Assets</u>	Years
Computer Software	5-13

De-recognition

Intangible assets are derecognised when the asset is disposed or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Application of Deemed Cost (Directive 7)

The Municipality opted to take advantage of the transitional provisions as contained in Directive 7 of the Accounting Standards Board, issued in December 2009. The Municipality applied deemed cost where the acquisition cost of an asset could not be determined. For Intangible Assets the depreciation cost method was used to establish the deemed cost as at 1 July 2007.

1.17 Impairment of non-financial asset***Cash Generating Assets***

Cash-generating assets are assets held with the primary objective of generating a commercial return.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Municipality estimates the asset's recoverable amount.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

a) External sources of information

- During the period, an asset's market value has declined significantly more than would be expected as a result of the passage of time or normal use;
- Significant changes with an adverse effect on the Municipality have taken place during the period, or will take place in the near future, in the technological, market, economic or legal environment in which the Municipality operates or in the market to which an asset is dedicated;
- Market interest rates or other market rates of return on investments have increased during the period, and those increases are likely to affect the discount rate used in calculating an asset's value in use and decrease the asset's recoverable amount materially.

b) Internal sources of information

- Evidence is available of obsolescence or physical damage of an asset;

- Significant changes with an adverse effect on the Municipality have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, plans to dispose of an asset before the previously expected date, and reassessing the useful life of an asset as finite rather than indefinite;

- Evidence is available from internal reporting that indicates that the economic performance of an asset is, or will be, worse than expected.

The re-designation of assets from a cash-generating asset, to a non-cash generating asset or from a non-cash-generating asset, to a cash-generating asset shall only occur when there is clear evidence that such a re-designation is appropriate. A re-designation, by itself, does not necessarily trigger an impairment test or a reversal of an impairment loss. Instead, the indication for an impairment test or a reversal of an impairment loss arises from, as a minimum, the indications listed above.

An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs to sell, an appropriate valuation model is used. Impairment losses are recognised in the Statement of Financial Performance in those expense categories consistent with the function of the impaired asset.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the asset is adjusted in future periods to allocate the asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

An assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the Municipality estimates the asset's or cash-generating unit's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Financial Performance.

Non-Cash-Generating Assets

Non-cash-generating assets are assets other than cash-generating assets.

The Municipality assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Municipality estimates the asset's recoverable service amount.

In assessing whether there is any indication that an asset may be impaired, the Municipality considers the following indications:

a) External sources of information

- Cessation, or near cessation, of the demand or need for services provided by the asset;

- Significant long-term changes with an adverse effect on the Municipality have taken place during the period or will take place in the near future, in the technological, legal or government policy environment in which the Municipality operates.

b) Internal sources of information

ACCOUNTING POLICIES

- Evidence is available of physical damage of an asset;
- Significant long-term changes with an adverse effect on the Municipality have taken place during the period, or are expected to take place in the near future, in the extent to which, or manner in which, an asset is used or is expected to be used. These changes include the asset becoming idle, plans to discontinue or restructure the operation to which an asset belongs, or plans to dispose of an asset before the previously expected date;
- A decision to halt the construction of the asset before it is complete or in a usable condition;
- Evidence is available from internal reporting that indicates that the service performance of an asset is, or will be, significantly worse than expected.

An asset's recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use. If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss recorded in the Statement of Financial Performance.

The value in use of a non-cash-generating asset is the present value of the asset's remaining service potential. The present value of the remaining service potential of the asset is determined using any one of the following approaches:

- *depreciation replacement cost approach* - the present value of the remaining service potential of an asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.
- *restoration cost approach* - the cost of restoring the service potential of an asset to its pre-impaired level. Under this approach, the present value of the remaining service potential of the asset is determined by subtracting the estimated restoration cost of the asset from the current cost of replacing the remaining service potential of the asset before impairment. The latter cost is usually determined as the depreciated reproduction or replacement cost of the asset, whichever is lower.
- *service unit approach* - the present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before impairment, to conform to the reduced number of service units expected from the asset in its impaired state. As in the restoration cost approach, the current cost of replacing the remaining service potential of the asset before impairment is usually determined as the depreciated reproduction or replacement cost of the asset before impairment, whichever is lower.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

An impairment loss is recognised immediately in surplus or deficit, unless the asset is carried at a revalued amount in accordance with another Standard of GRAP. Any impairment loss of a revalued asset shall be treated as a revaluation decrease in accordance with that Standard of GRAP.

The Municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for an asset may no longer exist or may have decreased. If any such indication exists, the Municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for an asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. If this is the case, the carrying amount of the asset is increased to its recoverable service amount. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation), had no impairment loss been recognised for the asset in prior periods. Such a reversal of an impairment loss is recognised in the Statement of Financial Performance.

1.18 Inventories

Initial Recognition

Inventories comprise of current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the Municipality, and the cost of the inventories can be measured reliably. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus non-recoverable taxes, transport costs and any other costs in bringing the inventories to their current location and condition. Where inventory is manufactured, constructed or produced, the cost includes the cost of labour, materials and overheads used during the manufacturing process.

Where inventory is acquired by the Municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Subsequent Measurement

Inventories, consisting of consumable stores, finished goods, materials and supplies and work-in-progress, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

In general, the basis of allocating cost to inventory items is the weighted average method.

1.19 Financial Instruments

Financial instruments recognised on the Statement of Financial Position include receivables (both from exchange transactions and non-exchange transactions), cash and cash equivalents, annuity loans and payables (both from exchange and non-exchange transactions). The future utilization of Unspent Conditional Grants is evaluated in order to determine whether it is treated as financial instruments.

Initial Recognition

Financial instruments are initially recognised when the Municipality becomes a party to the contractual provisions of the instrument at fair value plus, in the case of a financial asset or financial liability not at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. If finance charges in respect of financial assets and financial liabilities are significantly different from similar charges usually obtained in an open market transaction, adjusted for the specific risks of the Municipality, such differences are immediately recognised in the period it occurs, and the unamortised portion adjusted over the period of the loan transactions.

Subsequent Measurement

Financial Assets are categorised according to their nature as either financial assets at fair value, financial assets at amortised cost or financial assets at cost. Financial Liabilities are categorised as either at fair value, financial liabilities at cost or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation.

***Receivables***

Receivables are classified as financial assets at amortised cost, and are subsequently measured amortised cost using the effective interest rate method.

For amounts due from debtors carried at amortised cost, the Municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. Objective evidence of impairment includes significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 90 days overdue). If the Municipality determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the Statement of Financial Performance. Interest income continues to be accrued on the reduced carrying amount based on the original effective interest rate of the asset. Loans together with the associated allowances are written off when there is no realistic prospect of future recovery and all collateral has been realised or has been transferred to the municipality. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognised, the previously recognised impairment loss is increased or reduced by adjusting the allowance account. If a future write-off is later recovered, the recovery is recognised in the Statement of Financial Performance.

The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate, if material. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate.

Payables and Annuity Loans

Financial liabilities consist of trade and other payables and annuity loans. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost using an effective interest rate, which is the initial carrying amount, less repayments, plus interest.

Cash and Cash Equivalents

Cash includes cash on hand (including petty cash) and cash with banks. Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, highly liquid deposits and net of bank overdrafts. The Municipality categorises cash and cash equivalents as financial assets carried at amortised cost.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

Non-Current Investments

Investments which include investments in Municipal Entities and fixed deposits invested in registered commercial banks, are stated at amortised cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the Statement of Financial Performance in the period that the impairment is identified.

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is recognised in the Statement of Financial Performance.

The carrying amounts of such investments are reduced to recognise any decline, other than a temporary decline, in the value of individual investments.

De-recognition

Financial Assets

A Financial Asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired; or
- the Municipality has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Municipality has transferred substantially all the risks and rewards of the asset, or (b) the Municipality has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Municipality has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset, nor transferred control of the asset, the old asset is derecognised and a new asset is recognised to the extent of the Municipality's continuing involvement in the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Municipality could be required to repay.

When continuing involvement takes the form of a written and/or purchased option (including a cash settled option or similar provision) on the transferred asset, the extent of the Municipality's continuing involvement is the amount of the transferred asset that the Municipality may repurchase, except that in the case of a written option (including a cash settled option or similar provision) on an asset measured at fair value, the extent of the Municipality's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial Liabilities

A Financial Liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the Statement of Financial Performance.

Offsetting of Financial Instruments

Financial Assets and Financial Liabilities are offset and the net amount reported in the Statement of Financial Position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

1.20 Statutory receivables

Statutory receivables arise from legislation, supporting regulations, or similar means and require settlement by another entity in cash or another financial asset. Statutory receivables can arise from both exchange and non-exchange transactions.

Initial Recognition

ACCOUNTING POLICIES

Statutory receivables are recognised when the related revenue is recognised or when the receivable meets the definition of an asset.

Subsequent Measurement

The Municipality initially measures the statutory receivables at their transaction amount. The Municipality measure statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to reflect any:

- a) interest or other charges that may have accrued on the receivable;
- b) impairment losses; and
- c) amounts derecognised.

The Municipality assesses at each reporting date whether there is any indication that a statutory receivable may be impaired. If there is an indication that a statutory receivable may be impaired, the Municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable is reduced, through the use of an allowance account. The amount of the loss is recognised in the Statement of Financial Performance. In estimating the future cash flows, the Municipality considers both the amount and timing of the cash flows that it will receive in future. Consequently, where the effect of the time value of money is material, the Municipality discounts the estimated future cash flows using a rate that reflects the current risk free rate and any risks specific to the statutory receivable for which the future cash flow estimates have not been adjusted.

An impairment loss recognised in prior periods for a statutory receivable is reversed if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows. Any previously recognised impairment loss is adjusted by adjusting the allowance account. The amount of any adjustment is recognised in the Statement of Financial Performance.

Derecognition

The Municipality derecognises a statutory receivable when:

- a) the rights to the cash flows from the receivable are settled, expire or are waived;
- b) the Municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- c) the Municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the Municipality:
 - derecognises the receivable; and
 - recognises separately any rights and obligations created or retained in the transfer.

1.21 Revenue

Revenue from Non-Exchange Transactions

Revenue from non-exchange transactions refers to transactions where the Municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Grants, transfers and donations received, or receivable, are recognised when the resources that have been transferred meet the criteria for recognition as an asset. A corresponding liability is raised to the extent that the grant, transfer or donation is conditional. The liability is transferred to revenue as and when the conditions attached to the grant are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the Municipality. Where public contributions have been received but the Municipality has not met the related conditions, it is recognised as an unspent public contribution (liability).

Revenue from third parties i.e. insurance payments for assets impaired, are recognised when it can be measured reliably and is not being offset against the related expenses of repairs or renewals of the impaired assets.

Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the Municipality.

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

Revenue shall be measured at the fair value of the consideration received or receivable.

When, as a result of a non-exchange transaction, a Municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the present obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability will be recognised as revenue.

Services in-kind that are significant to the Municipality's operations are recognised as assets and the related revenue when:

- it is probable that the future economic benefits or service potential will flow to the Municipality; and
- the fair value of the assets can be measured reliably.

If the services in-kind are not significant to the Municipality's operations or does not satisfy the above-mentioned criteria, the Municipality only disclose the nature and type of services in-kind received during the reporting period. When the criteria for recognition is satisfied, services in-kind are measured on initial recognition at their fair value as at the date of acquisition. Services in-kind include services provided by individuals to the Municipality and the right to use assets in a non-exchange transaction. These services meet the definition of an asset, because the Municipality controls the resource from which future economic benefits or service potential is expected to flow to the Municipality. The assets are immediately consumed and a transaction of equal value is also recognised to reflect the consumption of these services in-kind, resulting in a decrease of the asset and an increase in an expense. The Municipality therefore recognises an expense and related revenue for the consumption of services in-kind.

Revenue from Exchange Transactions

Revenue from exchange transactions refers to revenue that accrued to the Municipality directly in return for services rendered or goods sold, the value of which approximates the consideration received or receivable.

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- The Municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- The Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality;
- The costs incurred, or to be incurred, in respect of the transaction can be measured reliably.

At the time of initial recognition the full amount of revenue is recognised where the Municipality has an enforceable legal obligation to collect, unless the individual collectability is considered to be improbable. If the Municipality does not successfully enforce its obligation to collect the revenue this would be considered a subsequent event.

Interest revenue is recognised using the effective interest rate method.

Revenue from the rental of facilities and equipment is recognised on a straight-line basis over the term of the lease agreement.

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant tariff. This includes the issuing of licences and permits.

Revenue from the sale of goods is recognised when substantially all the risks and rewards in those goods are passed to the consumer.

Revenue arising out of situations where the municipality acts as an agent on behalf of another entity (the principal) is limited to the amount of any fee or commission payable to the municipality as compensation for executing the agreed services. The Municipality performs an agency function on behalf of the Provincial Administration: Western Cape for the proclaimed roads within its area.

Revenue is measured at the fair value of the consideration received or receivable.

The amount of revenue arising on a transaction is usually determined by agreement between the entity and the purchaser or user of the asset or service. It is measured at the fair value of the consideration received or receivable taking into account the amount of any trade discounts and volume rebates allowed by the entity.

In most cases, the consideration is in the form of cash or cash equivalents and the amount of revenue is the amount of cash or cash equivalents received or receivable. However, when the inflow of cash or cash equivalents is deferred, the fair value of the consideration may be less than the nominal amount of cash received or receivable. When the arrangement effectively constitutes a financing transaction, the fair value of the consideration is determined by discounting all future receipts using an imputed rate of interest. The imputed rate of interest is the more clearly determinable of either:

- The prevailing rate for a similar instrument of an issuer with a similar credit rating; or
- A rate of interest that discounts the nominal amount of the instrument to the current cash sales price of the goods or services.

The difference between the fair value and the nominal amount of the consideration is recognised as interest revenue.

When goods or services are exchanged or swapped for goods or services which are of a similar nature and value, the exchange is not regarded as a transaction that generates revenue. When goods are sold or services are rendered in exchange for dissimilar goods or services, the exchange is regarded as a transaction that generates revenue. The revenue is measured at the fair value of the goods or services received, adjusted by the amount of any cash or cash equivalents transferred. When the fair value of the goods or services received cannot be measured reliably, the revenue is measured at the fair value of the goods or services given up, adjusted by the amount of any cash or cash equivalents transferred.

1.22 Related parties

The Municipality resolved to adopt the disclosure requirements as per GRAP 20 – “Related Party Disclosures”.

A related party is a person or an entity:

- with the ability to control or jointly control the other party,
- or exercise significant influence over the other party, or vice versa,
- or an entity that is subject to common control, or joint control.

The following are regarded as related parties of the Municipality:

a) A person or a close member of that person's family is related to the Municipality if that person:

- has control or joint control over the Municipality.
- has significant influence over the Municipality. Significant influence is the power to participate in the financial and operating policy decisions of the Municipality.
- is a member of the management of the Municipality or its controlling entity.

b) An entity is related to the Municipality if any of the following conditions apply:

- the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others).
- one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member).
- both entities are joint ventures of the same third party.
- one entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- the entity is a post-employment benefit plan for the benefit of employees of either the Municipality or an entity related to the Municipality. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity.
- the entity is controlled or jointly controlled by a person identified in (a).
- a person identified in (a) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by that person in their dealings with the Municipality. A person is considered to be a close member of the family of another person if they:

a) are married or live together in a relationship similar to a marriage; or

ACCOUNTING POLICIES

b) are separated by no more than two degrees of natural or legal consanguinity or affinity.

Management (formerly known as "Key Management") includes all persons having the authority and responsibility for planning, directing and controlling the activities of the Municipality, including:

- all members of the governing body of the Municipality;
- a member of the governing body of an economic entity who has the authority and responsibility for planning, directing and controlling the activities of the Municipality;
- any key advisors of a member, or sub-committees, of the governing body who has the authority and responsibility for planning, directing and controlling the activities of the Municipality; and
- the senior management team of the Municipality, including the Chief Executive Officer or permanent head of the Municipality, unless already included in (a).

Management personnel include:

- a) All directors or members of the governing body of the Municipality, being the Executive Mayor, Deputy Mayor, Speaker and members of the Mayoral Committee;
- b) Other persons having the authority and responsibility for planning, directing and controlling the activities of the reporting Municipality being the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

Remuneration of management includes remuneration derived for services provided to the Municipality in their capacity as members of the management team or employees. Benefits derived directly or indirectly from the Municipality for services in any capacity other than as an employee or a member of management do not meet the definition of remuneration. Remuneration of management excludes any consideration provided solely as a reimbursement for expenditure incurred by those persons for the benefit of the Municipality.

The Municipality operates in an economic environment currently dominated by entities directly or indirectly owned by the South African government. As a result of the Constitutional independence of all three spheres of government in South Africa, only parties within the same sphere of government will be considered to be related parties. Only transactions with such parties which are not at arm's length and not on normal commercial terms are disclosed.

1.23 Unauthorised Expenditure

Unauthorised Expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, Municipality or Organ of State and expenditure in a form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.24 Irregular expenditure

Irregular Expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No. 56 of 2003), the Municipal Systems Act (Act No. 32 of 2000), the Public Office Bearers Act, and (Act. No. 20 of 1998) or is in contravention of the Municipality's Supply Chain Management Policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.25 Fruitless and wasteful expenditure

Fruitless and Wasteful Expenditure is expenditure that was made in vain and could have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure (measured at actual cost incurred) in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

1.26 Contingent liabilities and contingent assets

A Contingent Liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent liability could also be a present obligation that arises from past events, but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to the obligation or the amount of the obligation cannot be measured with sufficient reliability.

The Municipality does not recognise a contingent liability or contingent asset. A Contingent Liability is disclosed unless the probability of an outflow of resources embodying economic benefits or service potential is remote. A contingent asset is disclosed where the inflow of economic benefits or service potential is probable.

Management's judgement is required when recognising and measuring contingent liabilities.

1.27 Significant accounting judgements and estimates

In the process of applying the Municipality's accounting policy, management has made the following significant accounting judgements, estimates and assumptions, which have the most significant effect on the amounts recognised in the financial statements:

Post-retirement Medical Obligations, Long Service Awards and Ex Gratia Gratuities

The cost of post-retirement medical obligations, long service awards and ex-gratia gratuities are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Major assumptions used are disclosed in note 14 of the Annual Financial Statements. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

Impairment of Receivables

The calculation in respect of the impairment of debtors is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments based on their creditworthiness. This was performed per service-identifiable categories across all classes of debtors.

Property, Plant and Equipment

The useful lives of property, plant and equipment are based on management's estimation. Infrastructure's useful lives are based on technical estimates of the practical useful lives for the different infrastructure types, given engineering technical knowledge of the infrastructure types and service requirements. For other assets and buildings management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate. The estimation of residual values of assets is also based on management's judgement whether the assets will be sold or used to the end of their useful lives, and in what condition they will be at that time.

Management referred to the following when making assumptions regarding useful lives and residual values of Property, Plant and Equipment:

- The useful life of movable assets was determined using the age of similar assets available for sale in the active market. Discussions with people within the specific industry were also held to determine useful lives.

ACCOUNTING POLICIES

- Local Government Industry Guides was used to assist with the deemed cost and useful life of infrastructure assets.

- The Municipality referred to buildings in other municipal areas to determine the useful life of buildings. The Municipality also consulted with engineers to support the useful life of buildings, with specific reference to the structural design of buildings.

For deemed cost applied to other assets as per adoption of Directive 7, management used the depreciated replacement cost method which was based on assumptions about the remaining duration of the assets.

The cost for depreciated replacement cost was determined by using either one of the following:

- Cost of items with a similar nature currently in the Municipality's asset register;
- Cost of items with a similar nature in other Municipalities' asset registers, given that the other Municipality has the same geographical setting as the Municipality and that the other Municipality's asset register is considered to be accurate;
- Cost as supplied by suppliers.

For deemed cost applied to land and buildings as per adoption of Directive 7, management made use of an independent valuator. The valuator's valuation was based on assumptions about the market's buying and selling trends and the remaining duration of the assets.

Intangible Assets

The useful lives of intangible assets are based on management's estimation. Management considers the impact of technology, availability of capital funding, service requirements and required return on assets to determine the optimum useful life expectation, where appropriate.

Reference was made to intangibles used within the Municipality and other Municipalities to determine the useful life of the assets.

For deemed cost applied to intangible assets as per adoption of Directive 7, management used the depreciation cost method which was based on assumptions about the remaining duration of the assets.

Provisions and Contingent Liabilities

Management's judgement is required when recognising and measuring provisions and when measuring contingent liabilities. Provisions are discounted where the time value effect is material.

Provision for Staff leave

Staff leave is accrued to employees according to collective agreements. Provision is made for the full cost of accrued leave at reporting date. This provision will be realised as employees take leave or when employment is terminated.

Provision for Performance Bonuses

The provision for performance bonuses represents the best estimate of the obligation at year end and is based on historic patterns of payment of performance bonuses. Performance bonuses are subject to an evaluation by Council.

Revenue Recognition

ACCOUNTING POLICIES

Accounting Policy on Revenue from Non-Exchange Transactions and Accounting Policy on Revenue from Exchange Transactions describes the conditions under which revenue will be recognised by management of the Municipality. In making their judgement, management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: Revenue from Exchange Transactions and GRAP 23: Revenue from Non-Exchange Transactions. Specifically, whether the Municipality, when goods are sold, had transferred to the buyer the significant risks and rewards of ownership of the goods and when services are rendered, whether the service has been performed. The management of the Municipality is satisfied that recognition of the revenue in the current year is appropriate.

1.28 Taxes - value added tax

Revenue, expenses and assets are recognised net of the amounts of Value Added Tax. The net amount of Value added tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the Statement of Financial Position.

1.29 Capital commitments

Capital commitments disclosed in the financial statements represents the balance committed to capital projects on reporting date that will be incurred in the period subsequent to the specific reporting date.

1.30 Events after reporting date

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

If non-adjusting events after the reporting date are material, the Municipality discloses the nature and an estimate of the financial effect.

National Government Grants	18 729	289 581
Unspent Grants	2 372 849	2 538 556
Unpaid Grants	(18 729)	(289 581)
	2 354 120	2 248 975

See appendix "E" for reconciliation of grants from other spheres of government. The municipality complied with the conditions attached to all grants received to the extent of revenue recognised.

LG SETA project

CKDM paid LGSETA project related expenditure in advance to the amount of R 745 766 as at 30 June 2017; an amount of R 1 368 614 was received for the project during the year and expenditure for the year was paid out in the amount of R 302 000 during 2017/2018. In 2018/2019 an additional amount of R118 450 was paid to a service provider.

Please take note that Council has specifically stated that no more payments will be made to service providers linked to this project unless the full amount payable has been received from LGSETA.

The Municipality will only become liable for amounts to the various service providers if and when the workplace verification of learner competence is recorded as per the relevant qualification and SETA ETQA requirements. The LGSETA funding agreement has been extended to December 2019.

Included in the Unpaid Grants from National Government is a fully impaired balance of R270 852 relating to overspending on the EPWP grant during prior financial periods.

CENTRAL CAROO DISTRICT MUNICIPALITY
Annual Financial Statements for the year ended 30 June 2018
NOTES TO THE ANNUAL FINANCIAL STATEMENTS

14.1 Post Retirement Benefits

The Post Retirement Benefit Plan is a defined benefit plan, of which the members are made up as follows:

	2019	2018
In-service (employee) members	34	23
In-service (employee) non-members	115	105
Continuation members (e.g. Retirees, widows, orphans)	20	27
Total Members	169	155

The liability in respect of past service has been estimated to

In-service members	3 640 338	4 632 536
In-service (employee) non-members	1 184 981	328 133
Continuation members	9 096 168	11 126 469
Total Liability	13 921 487	16 087 138

The liability in respect of periods commencing prior to the comparative year has been estimated as follows:

	2017 Rm	2016 Rm	2015 Rm
Total Liability	16.359	16.866	15.552

Experience adjustments were calculated as follows:

	2018 Rm	2017 Rm	2016 Rm	2015 Rm
Liabilities: (Gain) / loss	-0.515	-0.117	1.453	0.791
Assets: Gain / (loss)	-	-	-	-

The municipality makes monthly contributions for health care arrangements to the following medical aid schemes:

Bonitas;
LA Health
Samwumed; and
Keyhealth - Hosmed.

Key actuarial assumptions used:

i) Rate of interest

Discount rate	9.15%	9.35%
Health Care Cost Inflation Rate	6.67%	7.25%
Net Effective Discount Rate	2.32%	1.96%
Maximum subsidy inflation rate	4.63%	5.06%
Net-of-maximum-subsidy-inflation discount rate	4.32%	4.08%

Grap 25 defines the determination of the Discount rate assumption to be used as follow:

"The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve."

Consequently, a discount rate of 9.15% per annum has been used. The corresponding index-linked yield at this term is 2.32%. These rates do not reflect any adjustment for taxation. These rates were deducted from the interest rate data obtained from the JSE after the market close on 28 June 2019.

ii) Mortality rates

The PA 90 ultimate table, rated down by 1 year with a mortality improvement p.a. from 2010

iii) Normal retirement age

It has been assumed that in-service members will retire at age 62, which then implicitly allows for expected rates of early and ill-health retirement.

	2019 R	2018 R

Health care inflation	-1%	198 700	1 344 900	1 543 600	-8%
Discount rate	1%	191 800	1 445 800	1 637 600	-3%
Discount rate	-1%	283 400	1 459 500	1 742 900	3%
Post-retirement mortality	-1yr	238 300	1 505 300	1 743 600	3%
Average retirement age	-1yr	249 300	1 486 600	1 735 900	3%
Withdrawal Rate	-10%	132 500	1 343 700	1 476 200	-12%

The Future-service Cost for the ensuing year is estimated to be R 333 054, whereas the Interest- Cost for the next year is estimated to be R1 235 596

14.2 Long Service Bonuses

The Long Service Bonus plans are defined benefit plans.

	2019	2018
Roads	110	97
Other	39	31
As at year end, the following number of employees were eligible for Long Service Bonuses.	149	128

Key actuarial assumptions used:

i) Rate of Interest

	2019 %	2018 %
Discount rate	8.10%	8.51%
General Salary Inflation (long-term)	5.52%	6.14%
Net Effective Discount Rate applied to salary-related Long Service Bonuses	2.45%	2.23%

Grat 25 defines the determination of the Discount rate assumption to be used as follow:

"The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve."

Consequently, a discount rate of 8.10% per annum has been used. The corresponding index-linked yield at this term is 2.45%. These rates do not reflect any adjustment for taxation. These rates were deducted from the interest rate data obtained from the JSE after the market close on 28 June 2019.

ii) Normal retirement age

It has been assumed that in-service members will retire at age 62, which then implicitly allows for expected rates of early and ill-health retirement.

CENTRAL CAROO DISTRICT MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2018

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

	2019 R	2018 R
The amounts recognised in the Statement of Financial Position are as		
Present value of fund obligations	2 207 518	2 188 886
Net liability	2 207 518	2 188 886

The liability in respect of periods commencing prior to the comparative year has been estimated as follows:

	2017 R	2016 R	2015 R
Total Liability	1 778 965	1 748 137	1 918 246

Experience adjustments were calculated as follows:

	2018	2017	2016
Liabilities: (Gain) / loss	144 146	127 240	(54 603)
Assets: Gain / (loss)	-	-	-

Reconciliation of present value of fund obligation (LSA):

	2018	2017
Present value of fund obligation at the beginning of the year	2 118 886	1 778 985

Withdrawal Rate	-50%	224 500	190 100	414 600	21%

The Future-service Cost for the ensuing year is estimated to be R 223 346, whereas the Interest- Cost for the next year is estimated to be R 170 380.

CENTRAL CAROO DISTRICT MUNICIPALITY
Annual Financial Statements for the year ended 30 June 2018
NOTES TO THE ANNUAL FINANCIAL STATEMENTS

14.3 Ex - Gratia Benefits

The Ex - Gratia plans are defined benefit plans.
Roads

As at year end, the following number of employees were eligible for Ex - Gratia benefits.

2019 R	2018 R
7	9
7	9

Key actuarial assumptions used:

i) Rate of interest

	2019 R	2018 R
Discount rate	8.00%	8.96%
Benefit increase rate (CPI inflation)	4.31%	5.52%
Net Effective Discount Rate	3.54%	3.26%

Grap 25 defines the determination of the Discount rate assumption to be used as follow:

"The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve."

Consequently, a discount rate of 8.00% per annum has been used. The corresponding index-linked yield at this term is 3.54%. These rates do not reflect any adjustment for taxation. These rates were deducted from the interest rate data obtained from the JSE after the market close on 28 June 2019.

ii) Normal retirement age

It has been assumed that in-service members will retire at age 63, which then implicitly allows for expected rates of early and ill-health retirement.

Reconciliation of present value of fund obligation (Ex-Gratia):

	2019 R	2018 R
Present value of fund obligation at the beginning of the year	447 980	527 223
Total expenses	(52 253)	(45 153)
Interest Cost	35 083	38 565
Benefits Paid	(87 336)	(83 708)
Actuarial (gains)/losses	(23 331)	(34 080)
Present value of fund obligation at the end of the year	372 396	447 980
<u>Less</u> Transfer of Current Portion - Note 11	(181 422)	(115 321)
Non-current portion	190 974	332 659

Sensitivity Analysis on the Unfunded Accrued Liability

Assumption	Change	Liability (R)	% change
Central assumptions		372 396	
Benefit Increase rate	+1%	380 478	2%
Benefit Increase rate	-1%	364 655	-2%
Discount rate	+1%	364 980	-2%
Discount rate	-1%	380 273	2%
Average retirement age	-1yr	378 702	2%

Assumption	Change	Total Interest Cost (R)	% change
Central Assumption		35 083	
Pension increase rate	1%	36 281	3%
Pension increase rate	-1%	33 944	-3%
Discount rate	1%	37 795	8%
Discount rate	-1%	32 186	-8%
Average retirement age	-1yr	28 540	-19%

The is no Current service cost as there are no in-service members eligible for ex-gratia pension benefits, whereas the Interest Cost for the next year is estimated to be R 22 674.

14.4 Retirement funds

The Municipality requested detailed employee and pensioner information as well as information on the Municipality's share of the Pension and Retirement Funds' assets from the fund administrator. The fund administrator confirmed that assets of the Pension and Retirement Funds are not split per participating employer. Therefore, the Municipality is unable to determine the value of the plan assets as defined in GRAP 25.

As part of the Municipality's process to value the defined benefit liabilities, the Municipality requested pensioner data from the fund administrator. The fund administrator claimed that the pensioner data is confidential and were not willing to share the information with the Municipality. Without detailed pensioner data the Municipality was unable to calculate a reliable estimate of the accrued liability in respect of pensioners who qualify for a defined benefit pension.

Therefore, although the Cape Joint Retirement Fund is a Multi Employer fund defined as defined benefit plan, it will be accounted for as defined contribution plan. All the required disclosure has been made as defined in GRAP 25.31.

CONSOLIDATED RETIREMENT FUND FOR LOCAL GOVERNMENT

2019
R

2018
R

The contribution rate paid by the members (9,0%) and Council (18,0%). The last actuarial valuation performed for the year ended 30 June 2017 July 2018 revealed that the fund is in a sound financial position with a funding level of 100.3% (1 July 2015 - 100%)

Contributions paid recognised in the Statement of Financial Performance

35. FINANCIAL INSTRUMENTS DISCLOSURE

In accordance with GRAP 104 the Financial Instruments of the Municipality are classified as follows:

Financial assets

All the Financial Instruments are at amortised cost.

Receivables	7 202 476	5 084 515
Call deposits	5 887 680	4 585 551
Bank balances	1 163 318	3 521 476
Cash floats and advances	1 300	1 300

Financial liabilities

All the Financial Instruments are at amortised cost.

Non-current Capitalised Lease Liability	20 668	90 170
Trade creditors	2 019 434	4 564 130
Sundry creditors	1 189 286	236 886
Creditors roads	-	1 838 375
Debtors with credit balances	38 306	83 836
Current capitalised lease liability	69 502	67 409
	3 337 196	6 880 806

36. FINANCIAL SUSTAINABILITY

The indicators or conditions that may, individually or collectively, cast significant doubt about the going concern assumption are as follows:

Current assets exceeded current liabilities with the current ratio being 1.60 (2019)

Current assets exceeded current liabilities with the current ratio being 1.11 (2018)

Liquidity ratio of 1.20 (2019)

Liquidity ratio of 0.98 (2018)

Accumulated surplus of R8 050 495 (2019)

Accumulated surplus of R2 120 572 (2018)

The definition of a going concern is that no reason to believe that an institution will have to close down or liquidated in the foreseeable future and at least, but not limited to 12 months. The financial statements for this Municipality has been prepared, as indicated in the accounting policy, on a going concern assumption as allocations of equitable share have been promulgated in the Division of Revenue Act for the three financial years following after the reporting date.

These annual financial statements have been prepared on a going concern basis.

WESTERN CAPE GOVERNMENT**

Case no: 550/19

PA 190415 - 18 August 2016,

Ford Bakkie swept away in river current: R139 025.52

Case no: 222/19

PA 180 217 & PA 180 220 - 14 April 2016,

Collision of Swartberg Pass

Both claims are being opposed by the Municipality and further engagement will be taking place in terms of Section 41 of the Constitution 1996, Section 40(b) of intergovernmental regulation framework Act, 2005 and clause 29 of the Agreement.

**CKDM // CAPX INVOICE DISCOUNTING (PTY) LTD HIGH COURT CASE
NO: 6615/2017**

CKDM has been summonsed by the Plaintiff for payment of the amount of R 2 000 000, alternatively R 1 000 000. The cause of the action relates to the LGSETA project, in terms of which the implementing agent (Africa Creek) ceded its rights in terms of the Turnkey Service Level Agreement between CKDM and Africa Creek to CAPX Invoice Discounting (Pty) Ltd. The Plaintiff now wishes to enforce its rights in terms of the Session Agreement for monies which is due to them by Africa Creek.

This claim is being defended by CKDM on the basis that the Turnkey Service Agreement between itself and Africa Creek has been validly terminated and that there is accordingly no funds payable to Africa Creek. The prospects in defending this claim is very good and there has been no movement on this matter for almost over a year now.

CENTRAL KAROO DISTRICT MUNICIPALITY

Audited Annual Financial Statements for the year ended 30 June 2019

NOTES TO THE AUDITED ANNUAL FINANCIAL STATEMENTS

	2019 R	2018 R
--	-----------	-----------

CKDM & AFRICA CREEK // ENTREPRENEURIAL BUSINESS SCHOOL (PTY) LTD / CB WILLIAMS TRAINING CC / BRIGHT IDEA PROJECTS 447 (PTY) LTD

The Plaintiff's cause of action against CKDM also relates to the LGSETA project, where Africa Creek was appointed as implementing agent and Africa Creek failed to pay the three Plaintiffs (Training Providers), monies which was due to the Plaintiff.

This claim has been defended by CKDM on the basis that Africa Creek is the party that is responsible for the payment of the Training Providers and not CKDM.

A summons was served on CKDM on 2 February 2018, the total amount being:

Entrepreneurial Business School (First Plaintiff)	R 318 000
CM Williams Training CC (Second Plaintiff)	R 397 500
Bright Ideas Projects 447 (Pty) Ltd (Third Plaintiff)	R 363 000

The outcome of the case is uncertain as the Plaintiffs are holding CKDM accountable on the basis that they are the Principal and Africa Creek was the Agent.

The plaintiffs have now lodged an application for condonation which will be heard in the High Court during August/September 2019.

FINANCIAL PERFORMANCE GUARANTEES FOR THE REHABILITATION OF LAND DISTURBED BY PROSPECT MINING IN TERMS OF THE EXECUTION OF ENVIRONMENTAL MANAGEMENT PLAN/PROGRAMME

On 12 September 2012 the municipality entered into 16 financial performance guarantees with the Department of Mineral Resources amounting to R1 301 980 relating to the future rehabilitation of burrow pits. No movement on any of the guarantees have taken place since 2012 and there is no expectation that it will be taken up in the foreseeable future.

NOTES TO THE AUDITED ANNUAL FINANCIAL STATEMENTS2019
R2018
R**38. FINANCIAL RISK MANAGEMENT****Financial risk management**

The Municipality's activities expose it to a variety of financial risks: market risk (including fair value interest rate risk, cash flow interest rate risk), credit risk and liquidity risk.

The Municipality's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Municipality's financial performance.

Foreign exchange currency risk

The Municipality does not engage in foreign currency transactions.

Price risk

The Municipality's is not exposed to price risks.

Interest rate risk

As the Municipality has interest-bearing liabilities, the Municipality's income and operating expenditure are substantially dependent on changes in market interest rates.

The Municipality analyses its potential exposure to interest rate changes on a continuous basis. Different scenarios are simulated which include refinancing, renewal of current positions, alternative financing and hedging. Based on these scenarios, the entity calculates the impact that a change in interest rates will have on the surplus/deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities.

The Municipality did not hedge against any interest rate risks during the current year.

Cash and Cash Equivalants	7 052 298	8 108 327
Long Term Finance Lease Obligation	(20 170)	(90 170)
The potential impact on the entity's surplus/deficit for the year due to changes in interest rates were as follow:		
1% (2018 + 0.5%) Increase in interest rates	70 838	80 182
0.5% (2018 - 0.5%) Decrease in interest rates	(35 419)	(40 091)

Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash or the availability of funding through proper budgeting.

The entity's risk to liquidity is a result of the funds available to cover future commitments. The entity manages liquidity risk through an ongoing review of future commitments and credit facilities.

The table below analyses the entity's financial liabilities into relevant maturity groupings based on the remaining period at the financial year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

CENTRAL KAROO DISTRICT MUNICIPALITY

Audited Annual Financial Statements for the year ended 30 June 2019

**NOTES TO THE AUDITED ANNUAL FINANCIAL STATEMENTS****Credit risk**

Credit risk is the risk that a counter party to a financial or non-financial asset will fail to discharge an obligation and cause the municipality to incur a financial loss.

Credit risk consists mainly of cash deposits, cash equivalents, trade and other receivables and unpaid conditional grants and subsidies.

No receivables are pledged as security for financial liabilities.

The municipality only deposits cash with major banks with high quality credit standing. Unspent government grants have to be cash backed, and as a result R2 538 556 are pledged as security for financial liabilities. Although the credit risk pertaining to cash and cash equivalents are considered to be low, the maximum exposure disclosed below.

The banks utilised by the municipality for current and non-current investments are all listed on the JSE (First National Bank, Nedbank and ABSA Bank). The credit quality of these institutions are evaluated based on their required SENS releases as well as other media reports. Based on all public communications, the financial sustainability is evaluated to be of high quality and the credit risk pertaining to these institutions are considered to be low.

The risk pertaining to unpaid conditional grants and subsidies are considered to be very low. Amounts are receivable from national and provincial government and there are no expectation of counter party default.

Long-term Receivables and Other Debtors are individually evaluated annually at reporting date for impairment.

Financial assets exposed to credit risk at year end are as follows:

	2019	2018
Receivables from non-exchange transactions	1 719 419	1 974 590
Cash and Cash Equivalents	7 052 298	8 108 327
Unpaid conditional grants and subsidies	18 729	289 581
Receivables from exchange transaction	5 483 057	3 109 925

STATEMENT OF FINANCIAL PERFORMANCE

A - Acceptable difference

B - Department of Transport + Permits and Licenses + Operational Revenue budget = R58 954 947. Actual is R 58 978 440, resulting in a R32 493 difference which is a 0% difference.

C - Downward adjustment made after Provincial Treasury queried realistically anticipated revenue. Original deviation would have been 6%. Acceptable difference - slightly lower interest received than expected.

D - 9% -Acceptable difference.

E - 17% WOZA Grant of R 1000 000 unspent and Total System Grant of R763 819 was more than allocated. Unspent Grant was not budgeted for. 1% National Treasury Audit Support was also not fully Utilized.

F - 11% Actuarial provisions included in Employee cost Budget.

G - 8% Acceptable difference.

H - Total budget: R54 180 613, Actual: R50 291 562, Variance: R 3 889 051, resulting in a 7 % difference. The budget was done as a combined expectation as mSCOA chart changes remained a challenge. Actual expenditure on Roads driven by cost drivers as projects evolve.

I - Asset acquisition timing impacted on expected depreciation charged.

J - Immaterial amount.

K - Replacement of the Sound System in Council Chambers.

L - Immaterial amount.

M - Positive movement on debtors expectation of repayment.

STATEMENT OF FINANCIAL POSITION

N -Stock balance at year end greater than predicted

O - Roads May and June invoice was still outstanding from Western Cape Provincial Department of Roads.

P - Settlements made earlier than anticipated

Q - Remaining balance on LGSETA not budgeted for as project should have been finalised.

R - VAT receivable not budgeted

S - Strict cashflow management and budget control impacted positively on cash balance. Unspent conditional grant must also be cash backed. Cashflow management resulted in a lower outstanding creditor balance than predicted.

T - Employee benefit movement, actuarial movements unpredictable because of external factors impacting on variables used in calculation.

U - Cost of Microsoft licences increased significantly.

V - No new finance leases entered into as Council approval was awaited.
